

# Tips for a safe and *happy* halloween

KohlsSafeandHealthy.com

## frankly, CHOOSE COSTUMES CAREFULLY

- Choose costumes that fit properly. Costumes should be large enough to allow warm clothes underneath and short enough to prevent tripping.
- Use face paint in place of masks. Wash face paint off at the end of the day.
- Make flashlights, glow tape and glow sticks part of your costume to make sure drivers can see you.

### TOP COSTUMES:

1. STAR WARS
2. SUPERHERO
3. PRINCESS

**superhero alert:** Never tie capes around a child's neck. Use Velcro instead. Explain to younger children the difference between what people do on TV or in movies and what they can do in real life.

IN 2017,  
HALLOWEEN IS  
ON A TUESDAY.

## PICK TREATS WISELY

- After trick-or-treating, check all candy. If it's not wrapped, don't eat it.
- Keep all hard candy away from kids younger than 3 years of age to prevent choking.
- Food allergies are serious. Consider offering non-food items like stickers or temporary tattoos instead of candy.

## DECORATE WITH CARE

- Consider small children when creating spooky displays.
- Keep lights on and make sure paths are well-lit and free from tripping hazards.
- Illuminate carved pumpkins with flashlights or glow sticks rather than candles to prevent fire.
